Residential Fire Safety Equipment Report

Homeowner: As a homeowner or tenant in a multi-unit residential facility, you are required to complete this report and submit it to the property management or homeowners' association (HOA) annually, unless the management is doing the required maintenance for you. We recommend that detectors be tested in the spring and fall—same time you change the clocks for daylight savings time. Portable fire extinguishers must be inspected once a year and hydrostatically tested every five years.

Property Manager or HOA Administrator: As a property manager or homeowners' association administrator, you are required to obtain Residential Fire Safety Equipment Reports for each unit annually. The reports must be kept on file and ready for inspection by Denver Fire Department personnel for three years.

You may download additional forms at: www.denvergov.org/fire
